

★ Please Take a Moment to Read ★

Our goal is to design and disseminate quality educational activities that honor modeling as an important act of science and art. In order to accomplish this, all of our projects include the following terms of use:

1. Files and Models Are For You and Your School Only - Sharing links to our website on social media or with your colleagues is always appreciated, but please do not give any purchased 3D printing files or 3D printed models to other schools or institutions. Please do not post any purchased 3D printing files to social media or 3D printing file-share websites (Shapeways, Thingiverse, etc.). All purchased files are covered by copyright, and are for you and your school's use alone.

We also encourage you to make any students using these files aware of our terms. Honoring this agreement is your way of helping us remain a useful educational resource. Thank you!

2. Files Are Provided “As Is” - We stand behind our high-quality 3D printing file designs - they are tested and can be printed on the vast majority of desktop FDM plastic 3D printers. However, because of the wide range of 3D printers on the market, ShoeBox Education cannot guarantee your prints will be successful. And while we appreciate design feedback very much, we do not have the resources to help trouble shoot 3D printing issues not specifically related to ShoeBox Education 3D file designs.

If at any point you are unsatisfied with a project or the 3D printing files it included, we will offer a full refund. So that this policy is not abused, only three refunds will be given before projects must be purchased without the potential for a refund.

3. Ideas are Welcome! - We cannot overstate our appreciation for the creative input of career educators. Every day teachers find a way - with limited time and resources - to engage their students. If you have an idea for a new project based on an activity or concept that works in your classroom, or a suggestion for how to improve one of our existing projects, we want to hear about it!

Send us a message at www.shooboxeducation.com/feedback.

★ **NOTE:** ShoeBox Education designs are **not** toys - they are educational models designed for the recommended ages listed with each project. Some projects include choking hazard components and other features not suitable for children below the recommended age.
